## Let's Discuss Balloon Arches and Balloon Varieties

**What type of balloon arches are available for weddings and events?**

Balloon arches look great at the doorway to your event welcoming your guest inside, by setting the stage right from the start for the event design inside. A balloon arch frames a dance floor beautifully. Add balloon columns at each corner and you have a dance floor not soon forgotten and ready to fire up your party!.

Loch Lomond Balloons arches are far more than just "symmetrical structures" They are fantastic creations for anywhere you need them. So let's create a fantastic balloon arch (or two!) for you and your next event.

There are several types of balloon arches you can choose from to add a stunning focal point to your wedding decor:

1. **Classic Balloon Arch:** This timeless design features a simple yet elegant arch composed of balloons in your chosen colours, perfectly suited for entrance ways or as a backdrop for photos.
2. **Single Arches** - Often referred to as a "String of Pearls" arch due to its appearance, a single arch consists of a solitary row of balloons arranged in a straight line. These arches are cost-effective and are best suited for indoor events.
3. **Double Arch** - A truly unique feature we offer involves balloons forming an arch that resembles a zipper design or butterfly wings. This distinctive feature is always a real showstopper, much like single and double arches. It should be utilised solely indoors.

4. **Packed or Triple Arch** –Our substantial, bold, classic arch design can be crafted in various patterns. We provide a range of options, including the widely loved spiral, blocks of color, stripes, random arrangements, solid hues, zig-zag, diamond shapes, and much more.
5. **Organic Balloon Arch**: For a more whimsical and natural look, organic arches utilise balloons of varying sizes and colours, creating a flowing, asymmetrical design that mimics the beauty of nature.
6. **Floral Balloon Arch**: Incorporating fresh or faux flowers into the balloon arch adds a romantic and lush touch, blending the beauty of blooms with the festive flair of balloons. The foliage and flowers can be incorporated into balloon decorations to compliment the bridal party bouquets.
7. **Foil Balloon Arch** – What is a foil balloon? A foil balloon is a balloon made from a thin, metallic material, often called mylar. Unlike latex balloons, they are not porous, so they hold helium longer, making them ideal for long-lasting decorations. They have a shiny, reflective or matt effect look and come in various shapes and designs like stars, hearts, letters, and numbers. Foil balloons can be customised with messages or logos and are less likely to pop, making them durable for indoor and outdoor events. They can be reused if deflated and re-inflated properly, offering a more sustainable option. However, they should be disposed of responsibly, as they are not biodegradable. These are long lasting arches that work great indoors or out. Foil balloons create a dynamic, brilliant metallic shine that will surely command the attention of your guests and can potentially last for many days. (Outside weather permitting, foil balloons can tarnish with wet or damp weather, and also shrink when temperatures drop.)
8. **Double or Triple Arch**: For a grander statement, consider a double or triple arch, which layers multiple arches together, creating a more opulent and dimensional display.
9. **Themed Balloon Arch**: Tailored to fit your wedding theme, these arches can incorporate specific colours, patterns, or even custom shapes to match the overall aesthetic of your celebration.
10. **Spiral Balloon Arch**: This eye-catching design features spirally arranged balloons in alternating colors, creating a dynamic and playful effect that adds energy and movement to any setting. Perfect for entrances or as a lively photo backdrop, spiral arches can be customized to match your wedding's color palette, making them a versatile and vibrant addition to your celebration. Our team can work closely with you to ensure that every detail of your spiral balloon arch aligns with your vision, adding a touch of whimsy and joy to your special day.
11. **Link-A-Loon (G-Link) Balloon Arch** - is a unique design that utilises special balloons with attachable ends, making it possible to create various interconnected shapes. This design is ideal for creating distinct impressions without visible supports, providing a sleek and modern appearance. Link-A-Loon balloons offer great flexibility, allowing you to create large or small shapes, perfect for being the centerpiece of your event. Our team is delighted

to assist you in designing a Link-A-Loon Balloon Arch that reflects your vision, creating an impressive display that your guests will remember.

## **Illuminated LED Balloon Lighting – Let's Dive In!**

**Illuminated Balloon Arch:** Adding LED lights to your balloon arch creates a magical glow or flashing lights, perfect for evening events or to highlight key areas of your venue.

Each style can be customised to reflect your personal taste and wedding theme, ensuring a unique and unforgettable element that enhances your special day. Our team at Balloons N More is eager to help you design the perfect balloon arch that aligns with your vision and leaves a lasting impression on your guests.
