

STEP-BY-STEP GUIDE: LOCHLOMONDBALLOONS.CO.UK 6-Ft CIRCULAR ORGANIC BALLOON ARCH KIT STEP-BY-STEP GUIDE

Loch Lomond Balloons - We have you party popping!!

Step-by-Step Guide: 6-Ft Circular Organic Balloon Arch

STEP 1: Inflate Your Balloons (Very Important!)

🚫 Do not over-inflate — overfilled balloons become bulb-shaped.

12" Balloons

- Inflate to 10–11 inches
- Slight size variation is **GOOD** (some slightly smaller, some slightly bigger)
- Tie securely

5" Balloons

- Inflate almost full
- Set aside for later

👉 **Pro Tip:** Inflate everything first so assembly goes fast and stress-free.

STEP 2: Build the Base Clusters (12" Balloons)

- Take 4 balloons at a time
- Tie into quads (two pairs twisted together)
- Make 7 quads total
(28 balloons per quad set = 112 balloons total)

These quads will form the backbone of the arch.

STEP 3: Attach Balloons to the Frame

- Start at the bottom of the circular frame
- Twist the center of a quad around the frame
- Rotate each quad slightly as you go to avoid straight lines
- Continue adding quads up and around the circle

📌 **Space them evenly, but don't stress — organic is forgiving.**

👉 When finished, the frame should be mostly covered, with visible gaps (we'll fill those next).

STEP 4: Begin Filling Gaps with 5" Balloons

- **Inflate your 5" balloons**
- **Gather 6–8 balloons at a time**
- **Twist into quads or sixlets (two sets intertwined)**
- **Begin filling gaps throughout the arch**

🔍 Step back at least 10 feet and look for areas that need more volume or balance.

STEP 5: Add Accent Balloons

Attach accent balloons asymmetrically:

- **One near the top side**
- **One on the mid-side**
- **One on the lower opposite side**

Use balloon tape, fishing line, or tie directly into nearby balloons.

🚫 Do not space evenly — uneven placement = organic magic ✨

STEP 6: Fill Remaining Gaps with 5" Balloons

This is where the arch really comes alive ✨

- Tie 5" balloons in pairs or trios
- Use glue dots to tuck them:
 - Between quads
 - Around larger balloons
 - Anywhere you see holes

• Step back often and fill visually, not mathematically.

Focus on depth and flow, not symmetry.

STEP 7: Final Adjustments

- Rotate balloons so colors are balanced
- Push some balloons forward, some back
- Hide knots inside clusters
- Add extra 5" balloons anywhere that feels flat

Your arch should now:

- ✓ Look full from 5–10 feet away
- ✓ Have varied balloon sizes
- ✓ Flow naturally around the circle
- ✓ Hide the frame almost completely

Extra Pro Tips 💡

- Start with fewer 5" balloons
- Add gradually — you can always add more, but overfilling is harder to fix
